

Homemade Awning cleaner Recipe

I am always being asked for my recipe for cleaning the awning on a RV.

When doing this I use a 1 gallon pump sprayer and a long handled car washing brush. I dip the brush into the solution and scrub any dirty areas that need cleaning then soak the entire awning on both sides with the pump solution before rolling it up.

Recipe

¼ cup dish soap

¼ cup bleach

5 gallons of water

Mix above in a bucket and apply to awning.

Roll awning up and let stand 10 to 15 minutes

Unroll awning and rinse well
